

Ultimate Importer

You need to import records into iMIS. But how?

We can solve it.

Take data from any spreadsheet and seamlessly import into iMIS.

A difficult problem made easy

- Any spreadsheet, any format
- Import customer records, addresses, demographics and more
- Flows seamlessly into your iMIS records and user-defined fields

Automatically aligns data

- De-duplicate outside data to eliminate overlap
- Easily creates de-duping rules to insure consistency of data flow, for example:
 - Create simple rules to handle prefixes (Mr./Ms./etc.), addresses (Cir. vs. Circle), etc.
 - Create simple rules for handling names (William vs. Bill, etc.)
 - Validates all data and match to your iMIS business rules
 - Exceptions flagged and reported

Provides the technology and flexibility you need

- Utilizes .NET iMIS Business Objects
- Flow data into person or company records (plus link the two if needed)
- User-friendly interface
- Simple, intuitive process for creating or changing rules

we can solve it.
