Check-in Module

Wish you could integrate bar code scanners into your check-in process to be more

We can solve it.

Use iMIS and barcode scanner technology to facilitate check-ins and instantly verify information. It's inexpensive, easy to install and easier to operate.

Who can use this?

For check-in at facilities or off-site meetings/events, used by:

- Organizations that conduct conferences or continuing education
- Groups with on-site check-in: churches, daycares, gyms, etc.

Useful additional features

- Look up feature allows staff to check-in individuals who have forgotten their membership cards
- Wave files to notify staff of key events at check-in, such as:
  - ☐ Member's birthdays
  - ☐ Notification of delinquent dues

Instantly identify and verify

- Rapid processing and check-in
- Utilizing barcode scanner technology
- No further keyboard or mouse actions needed
- Instant I.D. and visual (photo) verification
- Member info automatically displayed onscreen at check-in
- Activity automatically tracked and reported
