

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2013.04

ENHANCEMENTS

- New Event Store_Settings:
 - EventLoginButton - Text on button shown 'Login to Register' button.
 - EventRegistrationButton - Text on 'Register Yourself' button.
 - EventRegisterSomeoneElseButton - Text on 'Register Someone Else' button.
 - LBLEventError - Message displayed when there is an error like no functions found.
 - LBLEventFull - Message displayed when an event is at capacity.
 - LBLEventLogin - Message displayed to prompt login for registration.
 - LBLEventWebViewOnly - Message displayed when the event is set to view on web only.
 - LBLRegisterToCalculate - Text displayed when the Online Marketplace cannot determine pricing before someone logs in.
- Allow BCC Emails to Staff for Event Confirmation Letters - the ID number identified in Web Options on Event Setup will receive email copies of confirmation letters for that event.
- New Electronic Content General Lookup/Validation Tables:
 - STORE_ETYPES_CLICK_DESCRIPTION - Controls the text a customer sees after purchasing each type of electronic content.
 - STORE_ETYPES_EXPIRATION_DAYS - Controls the number of days a customer has access to each type of electronic content.
 - STORE_XXXX - Expands the functionality of the STORE_INTERNAL table where you can have a table for each type of electronic content.
- Added additional style sheet control over elements in dues when showing radio buttons.
- No longer using STOREEMAIL activity type.
- Added new fields to Confirmation Letter System:
 - Event_Code
 - Event_Early_Cutoff
 - Event_Regular_Cutoff
 - Order_Number
- Added Multi-Warehouse Support - The Online Marketplace can now identify which warehouses can be used for purchases in the desired order of selection.
 - New General Lookup/Validation Table - STORE_WAREHOUSES
- Added PDF Watermarking functionality
 - New Store_Settings:
 - ConfigWaterMarkPDFFiles
 - LBLWatermarkCopyrightStatement

RESOLVED ISSUES

- Modified member and nonmember labels in event listing to display what is entered into store settings. Added numerous classes to event listing to allow styling.
- Modified event style sheet to cause the event prices not to wrap.
- Modified the event address to show properly if there is a city and state but not an address. iMIS was adding an extra blank line that we removed.

we can solve it.

www.atsol.org

- Modified Specials images which was creating bloated URL's on each subsequent load of the home page.
- Modified Online Marketplace dues to properly handle changes in category during the join/renewal process.
- Modified ATS web services to look for blank, United States, or the value that you enter into the store setting called CONFIGDEFAULTCOUNTRYDATABASE when calculating tax.
- Modified display of pricing in event listing view when there is only one function in an event. If there is only one function, the system should show the member/nonmember price. If there is more than one function then it should say "register to calculate." The single function must be "REG" or use the STORE_EVENT_FUNCTION_PREFIXES to use other prefixes (e.g., MAIN).
- Corrected issue when ATS_DUES table had entries for Join, Renew and SUBS that caused interference with wildcard settings.
- Moved inline styles for Add to Cart Notice to style sheet so users can control the look and feel of the Add to Cart Notice.
- Corrected issue with email in Social Sharing that cause 'register' buttons to appear.
- Corrected issue where when using &expand=true on an event registration URL the settings to show/hide speakers and the Add to Calendar features were not being honored.
- Corrected Confirmation Letter Send Report to include registrant name.
- Modified View Previous Orders page to display transaction date instead of payment date for no-charge dues items.
- Modified system to allow for ampersand's in product categories in iMIS.
- Modified confirmation letter system to properly show registration date.
- Modified confirmation letter system to show credit card number as masked.
- Modified Online Marketplace to not show 'Login to Register' button for events set to View on Web.
- Corrected issue with entities and registrations.
- Modified View Previous Orders to not show quantity and price fields for order_lines with no price or quantity.
- Removed restriction on electronic document links to only show for ATS Bridges and those in STORE_INTERAL General Lookup table.
