

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2014.03

ENHANCEMENTS

- Modified MyOrders page to not show 'add to calendar' links for past events.
- Modified MyOrders page to not fail if the event definition has been removed for an event someone registered for.
- Modified Subscriptions to allow you to add a subscription if the person does not have a 'DUES' item and already had another Subscription item.
- Added new fields to the Event Confirmation Letters:
 - Registrant_Class
 - Registrant_Class_Description
 - Prefix
 - Suffix
 - Designation
 - Middle Name
 - Phone
- New Store_Settings:
 - Dues
 - LblDuesProcessSomeoneElseButton - text for button displayed when paying someone else's dues
 - ConfigDuesBillCompanyRecord - reserved for future use
 - Orders
 - ConfigOrdersBillCompanyRecord - when set to True, the Bill To ID on all orders will be set to the Company ID
 - Events
 - ConfigEventsBillCompanyRecord - when set to True, the Bill To ID on all registrations will be set to the Company ID

RESOLVED ISSUES

- Corrected issue where search results would return 1 more than what is set in the IntMaxSearchResults Store_Setting.
- Corrected issue with coupons and stored procedure pricing not working for products that had a special pricing rule setup by member type.
- Corrected issue with event coupons not properly being recorded.
- Changed Newest Items to sort by newest Publication Date.
- Corrected an issue with inactive ATS_Checkout_Windows displaying.
- Corrected issue with REG_ functions only requiring the one with the lowest Sort Sequence.
- Corrected issue in dues when paying someone else's dues where the logged in ID appeared more than once.
- Modified dues application to work correctly is the beginning status is not A or an asterisk in the ATS_DUES table.
- Corrected issue with clearing carts when registering someone else for an event.
- Corrected issue with not writing Gateway Reference Number not being written to the Trans.GATEWAY_REF field.
- Modified RadScriptManager to include imageLens script to fix missing magnifying glass on products.

we can solve it.
