

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2014.06.02

ENHANCEMENTS

General

- Added better error-trapping for GetBatchDetails errors.

Events

- Added support for PassKey.

RESOLVED ISSUES

General

- Corrected issue with coupons emptying the cart and causing an error.

BRIDGE RESOLVED ISSUES

General

- Bluesky Broadcast: Corrected issue with create link SCOID error.
- Modified the following bridges to accommodate a single order with multiple order lines that need to be 're-synched'. The error would appear when only some of the order lines would be synched to the third part. In that situation, when you try to re-synch the orders the other order lines would not be sent to the third-party LMS/Webinar company.
 - Digital Ignite
 - Digitec
 - GoToTraining
 - GoToWebinar
 - Moodle
 - Omnovia
 - Peach New Media
 - Scholar Lab
 - WebCourseWorks
- ScholarLab: Removed requirement for wsContacts license in ScholarLabClass.cs.
- Moodle: Change the send orders to Moodle to send Country Code instead of Country.
- CECity: Updates to bridge to push data to CECity.

we can solve it.
