

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2014.06.03

ENHANCEMENTS

General

- Added new Telerik dll's for compatibility with latest browsers. Telerik version 2014.2.618.40.
- Corrected issue with searches containing apostrophes not working.
- Improved performance on the myorders.aspx page to reduce timeouts.
- Modified the myorders.aspx page to not show a link to electronic documents or an LMS if the URL is blank in the appropriate general lookup table.

Events

- Ignore Event Maximum - New Store_Setting - ConfigEventIgnoreMaxRegistrantsForEvent - When set to False an event is considered full when the Maximum on the Define an Event screen is met. When set to True, the Maximum on the Define and Event screen is ignored and only function limits are enforced.

Bridges

- Implemented Single Sign-On (SSO) for WebCourseWorks

RESOLVED ISSUES

Billing

- Corrected issue where proration did not work if there was not special pricing setup on a dues product.

Bridges

- Updated web services for the following LMS bridges to process most recent orders first.
- For the following bridges modified action of order processing to continue processing orders that have no errors and display an error for those orders with errors.

Bluesky Broadcast	ReadyTalk
CECity	Refined Training
CommPartners	ScholarLab
