

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2014.12.02

ENHANCEMENTS

Events

- Updated registrations to add items to order based on Sort Sequence (CW 21457)

RESOLVED ISSUES

General

- Created more comprehensive error messages when there is an error adding an item to the cart (CW 21210)
- Corrected issue with error.aspx page where the error is accessed with https and does not have a referrer URL (CW 21370)
- Updated the store to avoid the following error “*Check PO Payment Number cannot be set for Credit Card Payments*” when the order is using a cash payment and the cash account is incorrectly marked as credit card (CW19446)
- Corrected issue when a freight coupon for a dollar amount would be recorded with the full possible amount of the coupon even if the freight was less (CW21225)
- Corrected error “There is no row at position 0” when using Global Payments (CW21618)

Events

- Corrected issue that returned an error when using default pricing on functions (CW 21189)
- Corrected issue where functions with overlapping times appeared to be in conflict (i.e. 1-3 3-5)(CW20167)

we can solve it.
