

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2015.04.05

ENHANCEMENTS

General

- Streamline checkout process
 - If there are no shippable or taxable items in the cart, checkout process can go directly to payment screen, skipping the review of the cart
 - New Store_Settings:
 - lblCheckout: Text for 'Checkout' button (This new button takes you directly to payment screen if there are no shippable or taxable items in the cart - default setting: Pay Now)
 - lblLoginToCheckout: Text for 'Login to Checkout' button
 - lblContinueShopping: Text for 'Continue Shopping' button
 - lblEnterPayment: Text for 'Enter Payment' button
- Added div tag around Featured Items so that they are identified as featured in search results (CW25356)
- Corrected issue with printing receipts and confirmation letters in Internet Explorer (CW25412)

RESOLVED ISSUES

General

- Corrected issue when registering for an event links would disappear in the boxes in the right gutter (CW25355)
- Corrected issue when adding a subscription to the cart with another item and then removing the subscription caused an error with the between the checkout total and the order total (CW25420)

Billing

- Corrected issue when using SplitCartByEntity in Store_Settings in conjunction with Store_Unbilled_Dues. When a mixed-entity cart was processed the entries in Store_Unbilled_Dues was processed for each entity resulting in possible incorrect statuses on Subscription products. (CW25251)
- Implemented a clearer message when an invalid stored procedure name is entered in the ATS_DUES user-defined table (CW25350)

Events

- Corrected issue when searching using EVENTTYPE=XXX in URL's (CW25342)

we can solve it.
