

we can solve it.

ATS ONLINE MARKETPLACE

RELEASE NOTES

VERSION: 2015.04.07-08

RESOLVED ISSUES

General

- Corrected issue with IblPromotions not updating and displaying (CW25694)
- Corrected issue when using Store_Kit_Events when Event/Function Codes were not correctly entered in the table and no error was displayed. An error message is now displayed that the function code is not valid. (CW21832)

Billing

- Correct issue where Store_Unbilled_Dues general lookup table settings were not being honored (CW25809)
- Correct issues with paid through dates when using bump proration (CW20165)
- Corrected issue with Store_Unbilled_Dues functionality updating dues product status even if there was an entry in Store_Unbilled_Dues to do nothing; status was being changed to A (CW25809)
- Correct issues with grace period not updating paid through dates correctly on renewals (CW26149)

Events

- Corrected issue with conflict codes displaying radio buttons versus checkboxes. (CW25823)
- Corrected issue when someone answers a survey question and then removes the answer. The question with no answer was being saved in ATS_Shopping_Cart and created errors. (CW27623)
- Corrected issue when there are multiple functions with linked functions. Any linked function past the first were not being added. (CW27625)
- Corrected issues with saving survey question answers (CW26961)

we can solve it.
