

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2017.06.8727

RESOLVED ISSUES

General

- Corrected issue with the `lblComplimentaryOrderButton` setting in `Store_Settings` that was not being honored. (CW35149)
- Updated email address validation to account for email addresses with capital letters. (CW35615)
- Updated handling of Product and Event titles when sent to Google Analytics to work around line breaks causing javascript errors. (CW35162)

Dues

- Corrected issue when adding a subscription mid-year and the syncing of the effective date with the primary dues item was sometimes off one day. (CW34760)

NEW FEATURES

General

- New `Store_Setting` (CW35932)
 - `PaymentAdminOptions`: This is a true/false setting that enables an additional radio button in the payment screen to select a specific cash account at checkout. When you select the cash account the payment will be treated like a check and no credit card or other payment type will be charged in real time. This feature is only available to staff that impersonate members through the administrative portal.
 - There is a new general lookup table that goes with this new setting called `Store_Admin_Payment_Options` where the names of the cash accounts offered are identified. This table contains the names of the cash accounts (case sensitive) in the `CODE` field of the general lookup table.
