

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2017.15.8870

RESOLVED ISSUES

General

- Corrected issue with the 'one or more items in your cart is not tied to your account' error. This occurred because there are items in the cart for the person checking out that were added before logging in and after logging in the ship to and bill to ID's were not updated correctly. (CW36504)

Events

- Corrected issue with saving an event registration. If you were using a SINGLE-SELECT or MULTI-SELECT checkbox and had previously saved answers, and were not yet using the iMIS 20 question manager, you would get the following error when saving an edited registration. (CW37112)

we can solve it.
