

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2018.44.9738

RESOLVED ISSUES

General

- Corrected an issue where a product without a category would not display in Newest Items. (CW47007)
- Modified payment screen to use a drop-down for expiration year to be a 2-digit year. Previously, there were issues with customers entering a 4-digit year that caused voids at the payment processor. (CW47619)
- Corrected issue to check for credit card expiration dates to be in the future. (CW47619)
- Corrected issue with validator on State/Province field that was causing errors on records with no state/province. (CW48047)
- Corrected issue that caused an error when the Store_Setting PaymentOnlineAutoDraftEnabled was set to false but PaymentCCSaveCards was set to true. (CW47617)
- Corrected misspelling of Prefix on 'Records with Invalid Prefix or Suffix' administrative portal audit report. (CW48254)
- Updates to Google Tag Manager (CW48018)
 - Google Tag Manager was not correctly reporting items on payment (after clicking the payment button). This has been corrected and will now post Google Tag Manager tags on checkout.
 - Corrected an issue with Google Tag Manager and Google Analytics when the title of a product contained a single quote.
 - Corrected issue where Google Analytics were not being written correctly on \$0 items.
- Added licensing check for enSYNC Online AutoDraft (CW48288)
 - Added a check to the Verify page in the administrative portal to check if the ATS license is enabled.
 - Modified Online Marketplace to bypass payment plans and retrieval/saving of credit cards if enSYNC license is invalid.
- Changed 'State is Required' text 'State/Province is required' when setting the shipping address. (CW48255)
- Update Online Marketplace to use jQuery 3.3.1 and Telerik to 2018.3.910.45. (CW48397)
 - **Clients who modified stylesheets for carousels will want to renew the stylesheets prior to go live.**
 - **Clients who were looking for a jQuery 3.3.1 update for PCI compliance should retest solutions.**
 - Updated the administrative portal to enhance the Verify function to show missing and misconfigured appSettings.
 - Modified the master page to replace jQuery 1.12.2 to 3.3.1.
 - Updated Telerik to the latest version of 2018.3.910.45.
 - Modified Best Sellers, Cross-sell Items, Newest Items, Promotions, Recently Viewed, Replacement Items and Featured Items to use Slick for the slider instead of Telerik.
 - Modified Highlights to use Bootstrap for displaying tabs instead of Telerik.
 - Modified the individual item display in the carousels to be easier to style.
 - Modified Special Items and Upsell Items to use carousels instead of Telerik.
 - Modified stylesheet to handle new styles.
 - Deprecated MemberProfile capabilities in the Marketplace that had not been use.

we can solve it.

www.atsol.org

- Corrected issue with Replacement Items text displaying when there are no replacement items.
- Updated Coupon Generator in the administrative portal to allow for the selection of multiple member types. (CW48095)

Dues/Billing

- Corrected issues with SUB (subscription) entries in the ATS_DUES table. The Marketplace was not honoring configurations in the SUB row for individual subscriptions. (CW47933)
- Modified Invalid Billing Cycles report in the administrative portal to report entries in ATS_DUES that include a billing cycle that doesn't exist. (CW48458)

we can solve it.
