

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2019.12.9990 & 2019.09.9959

ENHANCEMENTS

General

- Now supporting the ConfigGoogleTagManagerIdentifier entry in Store_Settings. Added GoogleTagManager script to the payment page if the GoogleTagManagerIdentifier is entered into Store_Settings. The tags for what the person bought are still there. People should only use this if they don't put the Google Tag Manager script into the wrapper page.
- Improved error reporting for coupons. (CW50395)

Billing

RESOLVED ISSUES

General

- Corrected issue with coupon generator where Max Uses Per Product Code was being set to 1 when no limit was set. (CW48529)
- Corrected issue where the coupon generator form would not clear after creating a coupon. (CW48530)

Billing

- Corrected issues with allowing someone to pay someone else's dues. (CW49835)
- Corrected issues with dues terms other than 12 months. (CW49806)
- Corrected issue with coupons when using enSYNC Online AutoDraft. Coupons for modules other than dues are now supported when using Online AutoDraft. Dues coupons will be removed from the cart if added. (CW49955)
- Corrected an issue where nonmembers were not able to purchase a non-dues item unless the record had a join date. (CW49787)

Events

- Corrected spelling error when not eligible to register for a function. (CW51005)
