ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: **2020.10.10775**

ENHANCEMENTS

General

- Modified COUPON_USE activities to include the ship to ID for dues payments and registrations. When a coupon is used an activity called COUPON_USE is created and the ship to ID is now written to the UF_3 field. The activity will continue to be written to the record of the person who checked out, as that is the person that actually used the coupon. (CW56978)

Billing

- Dues Product Prerequisites: A new general lookup table called Store_Dues_Product_Prereq will allow you to force the selection of one product before another one is displayed. Products in the dues wizard are displayed in the following order: Dues (DUES) >> Chapters (CHAPT) >> Sections (SEC) >> Miscellaneous (MISC) >> Subscriptions (SUB) >> Voluntary (VOL). This means that a product code with a product type of CHAPT can be a prerequisite for a product code with a product type of SEC but not the other way around. In addition, a product cannot be a prerequisite for a product with the same product type. For example, a MISC product cannot be a prerequisite for another MISC product. An example would be if you setup the Denver section to have a prerequisite of the Colorado chapter the Denver section only appears if the Colorado chapter is selected. (CW56965)

RESOLVED ISSUES

General

- Modified modal pop-up window to honor the lblContinueShopping and ContinueShoppingURL Store_Settings. (CW56522)
- Corrected issue with cross-sell, upsell, and replacement items not appearing on product/event detail pages. (CW57521)

Billing

- Corrected issue with subscriptions where the transaction date and fiscal period were being incorrectly set. In addition, the batches were not visible in the desktop for posting. (CW57161)
- Corrected issue where multiple chapter options would display the dues product code more than once. If there are multiple rows in the ATS_DUES table and the rows have different End Chapters and the billing cycles for each row contains the same product code it would appear multiple times. (CW56956)
- Corrected issue dues payments not being allowed on the last day of the month. (CW57408)

Events

we can solve it.
