

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2020.51.11346 & 2020.47.11304

ENHANCEMENTS

Billing

- Modification to Pay Later: Added Store_Settings to control whether Member Type is updated after a Pay Later selection. Also, this process will now also create a new PAYLATER activity. (CW63081) 2020.51.11346
 - New Store_Settings
 - DuesJoinPayLaterMakeMemberNow – True/False setting to control whether a person’s member type is updated after selecting Join and Pay Later.
 - DuesRenewPayLaterMakeMemberNow – True/False setting to control whether a person’s member type is updated after selecting Renew and Pay Later.
 - DuesPayLaterActivityType: Activity type used to record when a person selects join or renew and pay later.
 - New Activity Type: PAYLATER
 - This activity type will track:
 - Join or Renew
 - Product Codes
 - Effective Date
 - Amount Due
 - New Member Type
 - New Category
 - New Status

General

- Added performance improvements and addressed timeout issues with coupons. (CW63094) 2020.47.11304
- Modified the View Previous Orders page to not show a partial hyperlink if a URL is not valid. (CW63639) 2020.51.11346
- Modified the View Previous Orders page to show the Zoom join URL link. (CW63640) 2020.51.11346
- Modification to error trapping. Many ATS products (Online Marketplace and Webservices) trap for errors. Those errors can be written to the event viewer and sent via email. This is setup in the application settings. In some situations, this can generate several email messages. In many cases the error messages are repeats of the same error condition. This can overwhelm email inboxes. We have modified the system to allow you to set the maximum number of emails that will be sent each time the system is started. The counter will be reset when the application pool recycles, which is typically once per day. This new setting is `ATS.Utilities.ErrorHandler.MaxErrorEmails`. If it is not set or is blank, a default of 100 will be used. This will not affect writing the errors to the event viewer. This can be set to a number higher or lower than 100. When the maximum number of emails has been sent, an additional email will be sent with a warning that the maximum has been reached. Error emails will stop until the application pool is recycled. (CW63585) 2020.51.11346

Administrative Portal

- Added new dues administrative report to list people who have join dates but no paid through dates. (CW63579) 2020.51.11346

RESOLVED ISSUES

Donations

- Corrected issue when previously saved donation items in the cart are no longer available for sale on the web. (CW63093) 2020.47.11304

Billing

- Change to ignore Advance Start Date for delinquent members when using cash dues and annual dues. (CW63286) 2020.51.11346

General

- When the Online Marketplace reports to Google Analytics the product list 'Best Sellers' was sometimes being saved with 'Best Sellers' and sometimes 'BestSellers'. This has been normalized to always be 'Best Sellers'. (CW63572) 2020.51.11346
