

we can solve it.

ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2021.12.11554

ENHANCEMENTS

General

- Upgrade PayPal Express to use latest API. (CW65244)
- Enhance error trapping and reporting when processing payments. (CW64410)

Administrative Portal

- Added Pathable as an option to manage in the Bridges section of the administrative portal. (CW64143)

RESOLVED ISSUES

General

- Corrected issue with coupons with ship to ID restrictions when registering someone else or paying someone else's dues. (CW64781)

Events

- Modified search results to not allow quick add-to-cart if an event has only one function but has survey questions. (CW64259)
- Corrected issue when someone registered for an event at \$0 being unable to edit the registration to add additional items. (CW64311)
- Corrected issue when using linked functions in the desktop and any of the child functions is not set to show on the web. If using linked functions from the iMIS desktop, all child functions must be set to show on the web and there must be pricing. If any of the child functions have either of these requirements removed, a person could add the registration to the cart but when they go to pay the registration will be removed from the cart. (CW64661)

we can solve it.
