

we can solve it.

# ATS ONLINE MARKETPLACE RELEASE NOTES

VERSION: 2021.35.11924

## ENHANCEMENTS

### General

- Added new Store\_Setting to conditionally display a message on receipts. (CW68206, CW68112)
  - lblReceiptBottomNoteIQA – if populated with a path to an IQA the message defined in the query will display on receipts if the transaction is selected in the query. See Receipt Notes section in the user's guide about using this feature.
- Enhancement to paying open accounts receivable. Created a new Store\_Setting for the name of an IQA that determines which open invoices a customer can pay. (CW68208, CW68025)
  - OpenARIQA – Path to IQA that determines which open invoices a customer can pay.
- Added caching to General Lookup tables to improve performance. (CW68302)

### Administrative Portal

- Added new menu item under Setup in the Administrative Portal called Reset Lookup Tables that will refresh cache. (CW68302)

### Billing

- Added support for coupons with enSYNC Online AutoDraft for joins and renewals. Coupons will be applied to the overall dues before any payment plans are applied. (CW68174, CW68111)

## RESOLVED ISSUES

### Billing

- Corrected error which prevented a customer from deleting a subscription from the shopping cart where the customer is not the ship to ID. The Online Marketplace does not directly support purchasing subscriptions for other people, but some third-party applications allow it. (CW68235)
- Correct date calculation for subscriptions with anniversary billing in some situations. (CW68493, CW62933)

### Events

- Corrected issue when a registration is put into the cart before the registration end date but comes back after that date to checkout. That registration will now be removed from the cart (CW68487, CW67279)

we can solve it.

- Performance improvement when registering someone else. (CW68488)
- Corrected issue where registrations with multiple payments was showing the original payment date for all payments. (CW68489)

we can solve it.
