

Quality Control Module

Concerned about the quality and reliability of your data?

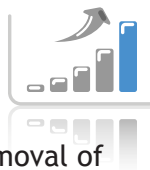

We can solve it.

Automatically identify data issues in your iMIS database.

// *This has taken the integrity of our database to a new level. Regularly -scheduled audits have eliminated the need for extensive data analysis, saving us valuable time and resources.* **//**

David Cook, VO, Data and Information Technology
Georgia Hospital Association

Lower costs and increase efficiency

- Efficiency savings with the removal of redundant data
- Correct recurring inefficiencies
- Increase revenue from more accurate identification of customers
- Increase customer satisfaction and retention
- Better regulatory compliance, fraud prevention and loss control

Raise your level of data integrity

- Easy, flexible implementation
- Automatic audit rules that reflect your unique business processes
- Schedule error reports to run as often as you need, emailed to the contact(s) of your choice
- Enables your organization to quickly respond to issues

we can solve it.
