- Own and maintain your own servers
 - Patching
 - Upgrade/replacing hardware
 - MS software licenses
- Power and Cooling concerns
 - Backup generator
- Connectivity
 - Multiple carriers for redundancy
 - Complex network hardware

- Hosted at vendors datacenter(s)
 - Limited locations, could be across the country
- Hardware refreshed on their cycle
- May have limited access to server(s)
- Shared network or shared services
- Possible restrictions on connectivity to 3rd parties

- No servers to maintain
- Server sizing can change up or down as needed
- Servers can be located close to staff
 - Multiple regions around the US
- MS Licenses Including in monthly fees
- Multiple DR options
 - Backups replicated to 2nd Region
 - Full VMs replicated to 2nd Region
- Large infrastructure
- Vendor Agnostic
- SSAE-16/SOC-1&2 Audited

- Designed for iMIS hosting
 - iMIS prerequisites installed at deployment
 - iMIS specific security changes to OS
 - Automated deployments for constant environment for vendors/developers
- RemoteApp for iMIS Desktop and other Applications
 - Run just the application, no 2nd desktop
 - Access to local drives from the server
 - Full RDP access for admins/power users
- Secure Network
 - Dedicated Subnet per client
 - Optional VPN access to Office or Vendors

- Server Maintenance handled
 - Daily Backups (Full VMs, Files & Databases)
 - Monthly Security Patches (OS and Middleware)
 - Security Software, AV Software and Cloud Security
- Work securely from anywhere (SSL)
 - RemoteApp
 - RDP
- SSAE-16 Audited
- Microsoft Gold Partner with Advanced Priority Support from MS

- Hosting Partner that knows iMIS
- Hosting iMIS for 8+ years
- US based Support Staff
- Proactive Monitoring of Servers, Resources and Websites
- Staff On-call 24/7
- Dedicated Security Staff
- Host additional websites/applications

- Plan out migration to minimize downtime for staff and members
- Perform a test migration prior to cutover
- Have a detailed test plan to verify functionality
- Map out all 3rd party integration with website
 - Check with vendor before migration to plan IP/Firewall/VPN changes

- Challenges
 - Slow responsiveness of Servers
 - Outdated hardware, no upgrade plan from host
 - Support requests not handled in a timely manner
- Setup
 - 3 server setup, TS/Application Server, Database Server, Web Server
- Results
 - Faster access to applications
 - Faster Website response time
 - More responsive Support
